

Jurisdiction Report - Aruba

Purpose of this paper

This paper draws on key data collected on the secrecy jurisdiction of Aruba. The full data set is available [here](#)¹. Background information about Aruba is available from a number of sources². The assessment provided in this paper relates to 12 indicators reflecting the legal and financial arrangements of this jurisdiction (Key Financial Secrecy Indicators, KFSI). Details of these indicators are noted at the end of this report. The detailed data that supports this analysis is available on the Mapping the Faultlines web site³. This survey was based on regulatory reports, legislation and regulation in force at 31.12.2008⁴.

Key findings

Aruba achieved a positive result for just two of the questions we asked. A transparency score of 17 per cent has been awarded for the positive assessment of indicator number 8 and 12. The negative assessment of all other indicators yields an opacity score of 83 per cent overall.

The numbers on the bottom axis of the left graph refer to the Key Financial Secrecy Indicators (KFSI) listed at the end of this report. The presence of a blue bar indicates a positive answer as does blue highlighted text in the analysis, below. The presence of a red bar indicates a negative answer as does red highlighted text below.

This weak opacity score arises because Aruba:

1. Provides **banking secrecy**;
2. Does not put **details of trusts on public record**;
3. Does not comply sufficiently with **international regulatory requirements**
4. Does not require that **company accounts be available on public record**;
5. Does not require that **beneficial ownership of companies is recorded on public record**;

6. Does not maintain **company ownership details in official records**;
7. Did not respond to **Tax Justice Network requests for information**;
8. **Participates in the European Union Savings Tax Directive**;
9. Has **few tax information agreements**;
10. Does not have **adequate access to banking information**;
11. Allows **company redomiciliation**;
12. **Does not allow protected cell companies**.

Other data⁵

	Number	Ranking ⁶
Financial services as a percentage of GDP	Not Available	Not Available
Number of multinational company subsidiaries in the jurisdiction	9	39
Number of Big 4 firms in the jurisdiction	4	-
Number of lawyers in the jurisdiction	16	24
Number of accountants in the jurisdiction	16	23

This data shows

1. That Aruba may have a significant dependence⁷ upon financial services;
2. That Aruba is not widely used⁸ by multinational companies from the jurisdictions that we surveyed⁹, suggesting that it is not considered significantly attractive by those corporations which are usually associated with low or no tax jurisdictions exhibiting political stability;
3. That the Big Four accounting firms do have a significant presence¹⁰ in Aruba, suggesting that it does host significant international activity;
4. That Aruba does not exhibit a significant number¹¹ of lawyers and accountants when compared to other secrecy jurisdictions, suggesting the relative insignificance of its activities.

Particular points to note

INCSR reports extensively about the extent of and recent development in Aruba's "offshore" financial industry: "Aruba is an autonomous and largely self-governing Caribbean island under the sovereignty of the Kingdom of the Netherlands; foreign, defense and some judicial functions are handled at the Kingdom level. Due to its geographic location, casinos, and free trade zones, Aruba is both attractive and vulnerable to narcotics trafficking and money laundering. Aruba has four commercial and two offshore banks, one mortgage bank, one credit union, an investment bank, a finance company, and eleven casinos. The island also has four registered money transmitters, two exempted U.S. money transmitters (Money Gram and Western Union), eight life insurance companies, 13 general insurance companies, four captive insurance companies, and 11 company pension funds. [...]" (INCSR 2008¹²: 91).

Next steps for Aruba

Aruba is a long way from offering financial transparency¹³. If it is to play a full part in the modern financial community and wishes to impede and deter illicit financial flows, including flows originating from tax evasion, aggressive tax avoidance practices, corrupt practices and criminal activities it should take action on the points noted where it falls short of acceptable international standards.

The indicators we used (KFSI)

1	Is legal banking secrecy banned (i.e. Is there no legal right to banking secrecy)?
2	Is there a Public Trust and Foundations Registry?
3	Does the FATF rate 90% largely compliant and with no non-compliant ratings?
4	Are company accounts available for inspection by anyone for a fee of less than US\$10?
5	Are details of the beneficial ownership of companies available on public record online for less than US\$10?
6	Are details of the beneficial ownership of companies submitted to and kept updated by a competent authority?
7	Did the jurisdiction participate in the TJN Survey in 2009 (1=both questionnaires; 0.5 one questionnaire)?
8	Does the jurisdiction fully participate in Automatic Information Exchange (the European Savings Tax Directive)?
9	Has the jurisdiction at least 60 bilateral treaties providing for broad information exchange clauses covering all tax matters (either DTA or TIEA)?
10	Has the jurisdiction's authority effective access to bank information for information exchange purposes?
11	Does the jurisdiction prevent company redomiciliation?
12	Does the jurisdiction prevent protected cell companies from being created in its territory?

⁴ With the exception of KFSI 9 for which the cut-off date is 30-6-2009.

⁵ Based on the jurisdiction database on this site or TJN research.

⁶ The number of ranked jurisdictions varies for each indicator mainly because of differing data availability. For the ranking of the ratio of Financial Services in GDP this number is 29; for the number of multinational companies' subsidiaries this number is 54; for lawyers the number is 25 and for accountants 26.

⁷ We defined significant dependence as a ratio of more than 5% of financial services in GDP.

⁸ We defined „widely used“ and „significant attraction“ as being indicated by the presence of 50 or more subsidiaries of multinational companies.

⁹ France, Germany, Netherlands, Switzerland, UK, USA.

¹⁰ We defined that the presence of the Big Four Accounting Firm is significant if there is more than one firm present.

¹¹ For defining a “significant” number of lawyers and accountants we used the ratio of lawyers and accountants per head of population, computed the average and defined the numbers above average to indicate relative significance in the secrecy jurisdictions’ activity.
