

Jurisdiction Report - Maldives

Purpose of this paper

This paper draws on key data collected on the secrecy jurisdiction of the Maldives. The full data set is available [here](#)¹. Background information about the Maldives is available from a number of sources². The assessment provided in this paper relates to 12 indicators reflecting the legal and financial arrangements of this jurisdiction (Key Financial Secrecy Indicators, KFSI).³⁴ Details of these indicators are noted at the end of this report. The detailed data that supports this analysis is available on the Mapping the Faultlines web site⁵. This survey was based on regulatory reports, legislation and regulation in force at 31.12.2008⁶.

Key findings

The Maldives achieved a positive result for just two of the questions we asked. A transparency score of 20 per cent has been awarded for the positive assessment of indicator number 7 and 12. The negative assessment of all other indicators yields an opacity score of 80 per cent overall⁷.

The numbers on the bottom axis of the left graph refer to the Key Financial Secrecy Indicators (KFSI) listed at the end of this report. The presence of a blue bar indicates a positive answer as does blue highlighted text in the analysis, below. The presence of a red bar indicates a negative answer as does red highlighted text below.

This weak opacity score arises because the Maldives:

2. Does not put **details of trusts on public record**;
3. Does not comply sufficiently with **international regulatory requirements**
4. Does not require that **company accounts be available on public record**;
5. Does not require that **beneficial ownership of companies is recorded on public record**;

- 6. Does not maintain **company ownership details in official records**;
- 7. **Did respond to both of Tax Justice Network's requests for information**;
- 8. Does not participate in the **European Union Savings Tax Directive**;
- 9. Has **few tax information agreements**;
- 11. Allows **company redomiciliation**;
- 12. **Does not allow protected cell companies**.

Other data⁸

	Number	Ranking ⁹
Financial services as a percentage of GDP	Not Available	Not Available
Number of multinational company subsidiaries in the jurisdiction	1	52
Number of Big 4 firms in the jurisdiction	3	-
Number of lawyers in the jurisdiction	411	16
Number of accountants in the jurisdiction	5	25

This data shows:

1. That the Maldives may have a significant dependence¹⁰ upon financial services;
2. That the Maldives is not widely used¹¹ by multinational companies from the jurisdictions that we surveyed¹², suggesting that it is not considered significantly attractive by those corporations which are usually associated with low or no tax jurisdictions exhibiting political stability;
3. That the Big Four accounting firms do have a significant presence¹³ in the Maldives, suggesting that it does host significant international activity;
4. That the Maldives does not exhibit a significant number¹⁴ of lawyers and accountants when compared to other secrecy jurisdictions, suggesting the relative insignificance of its activities.

Particular points to note

The absence of clear corporate law and the fact that redomiciliation of companies is free of cost suggests that the Maldives specializes in attracting redomiciled legal entities (FISB 2008¹⁵: 8). As regards protected cell companies, the Maldives appears to be considering offering them. A legal explanatory note by OsborneClarke writes: "Other jurisdictions (notably Jersey and the Cayman Islands) have recently enacted law providing for segregated portfolio companies, where companies established pursuant to a certain specific regime will have segregated cells. In due course this may be considered suitable for the Maldives. However, it would be sensible to wait to see if there is appetite for this, rather than introduce an additional complexity at this stage." (OsborneClarke¹⁶).

Next steps for the Maldives

The Maldives is a long way from offering financial transparency¹⁷. If it is to play a full part in the modern financial community and wishes to impede and deter illicit financial flows, including flows originating from tax evasion, aggressive tax avoidance practices, corrupt practices and criminal activities it should take action on the points noted where it falls short of acceptable international standards.

The indicators we used (KFSI)

1	Is legal banking secrecy banned (i.e. Is there no legal right to banking secrecy)?
2	Is there a Public Trust and Foundations Registry?
3	Does the FATF rate 90% largely compliant and with no non-compliant ratings?
4	Are company accounts available for inspection by anyone for a fee of less than US\$10?
5	Are details of the beneficial ownership of companies available on public record online for less than US\$10?
6	Are details of the beneficial ownership of companies submitted to and kept updated by a competent authority?
7	Did the jurisdiction participate in the TJN Survey in 2009 (1=both questionnaires; 0.5 one questionnaire)?
8	Does the jurisdiction fully participate in Automatic Information Exchange (the European Savings Tax Directive)?
9	Has the jurisdiction at least 60 bilateral treaties providing for broad information exchange clauses covering all tax matters (either DTA or TIEA)?
10	Has the jurisdiction's authority effective access to bank information for information exchange purposes?
11	Does the jurisdiction prevent company redomiciliation?
12	Does the jurisdiction prevent protected cell companies from being created in its territory?

⁵ <http://www.secrecyjurisdictions.com>.

⁶ With the exception of KFSI 9 for which the cut-off date is 30-6-2009.

⁷ This jurisdiction required a non-standard denominator when calculating its opacity score, for more on this see our explanation here:

<http://www.secrecyjurisdictions.com/jurisdictionreports/introductionjr>.

⁸ Based on the jurisdiction database on this site or TJN research.

⁹ The number of ranked jurisdictions varies for each indicator mainly because of differing data availability. For the ranking of the ratio of Financial Services in GDP this number is 29; for the number

of multinational companies' subsidiaries this number is 54; for lawyers the number is 25 and for accountants 26.

¹⁰ We defined significant dependence as a ratio of more than 5% of financial services in GDP.

¹¹ We defined "widely used" and "significant attraction" as being indicated by the presence of 50 or more subsidiaries of multinational companies.

¹² France, Germany, Netherlands, Switzerland, UK, USA.

¹³ We defined that the presence of the Big Four Accounting Firm is significant if there is more than one firm present.

¹⁴ For defining a "significant" number of lawyers and accountants we used the ratio of lawyers and accountants per head of population, computed the average and defined the numbers above average to indicate relative significance in the secrecy jurisdictions' activity.
